AGROMET ADVISORY BULLETIN FOR ATHAGAD

District Past week weather condition

The district received 7 mm rainfall during the last week. The mean daily maximum and minimum temperature was 25°C and 13°C, respectively. Relative humidity of the district was around 75-80%. According to NDVI map the agriculture vigor was moderate over maximum places, whereas according to SPI value, mildly wet condition was there.

Forecasted period: 08th January 2020 to 12th January 2020

General Advisory: Light rainfall is forecasted in Thursday and no rainy day remaining 4 days in the block. The day temperature will 26-27°C and night temperature will be 13-15°C for upcoming 5 days. Maximum and minimum relative humidity will be 81-87% and 30-46% respectively. There will be mainly cloudy sky for Thursday and the sky will be clear for remaining 4 days.

Agromet Advisory

Pulses:

- Land preparation and sowing is going on. The crop is at sowing to two week seedling stage.
- Aphids may infest the crop after this forecasted rain. Spray 60ml imidacloprid 17.8%SL or 50ml thiomethaxome 25%WG mixing with 200lit of water per acre crop area. Leaf eating caterpillar feeds on the young tender leaves. Spray fipronil 5% SL 400ml or indoxacarb14.5% SC 200ml mixing in 200lit. of water per acre crop.

Vegetables:

- Use low cost polythene cover above the vegetables nursery to avoid poor germination due to low temperature.
- Thrips and mites are prominent pests in vegetables at present. To control both, spray Bifenthrin@1g/litre or Profenophos@2ml/litre of water
- To control the sucking pests like aphid & white fly, spray Imidacloprid @ 5ml/10 lit of water.
- Current weather is favourable for attack of **Cabbage webber** and **tobacco caterpillar** in cole crops. To control these insects, go for alternate spray of Neem based formulation 1500ppm@600ml/acre and Imamectin benzoate@70g/acre **after the rain ceases.**
- Leaf eating caterpillar and fruit borer may infest cabbage, cauliflower and tomato after this rain. Spray fipronil 5% SL 400ml or emamectinbenzoate 5% SG 80gm or indoxacarb14.5% SC mixing in 200lit. of water per acre crop.
- **POTATO:** Complete planting of potato. Grow high yielding varieties like Kufri Chandramukhi, Kufri Chamatkar, Kufri Jyoti, Kufri Sinduri and Kufri Alankar, etc.6 to 8 q/acre seed potato of 25 g each piece (either whole or cut). Keep the seeds on floor in dark for 7 days for sprouting.

- In winter during cold hours farmers should keep doors, windows and open spaces in sheds covered with polythene or gunny bag curtains to keep the cowshed warm.
- Farmers should offer 20-30% more feed to counter the winter along with lukewarm water.
